

Payments International

Panel Discussion

Preparing for the arrival of PSD3

- How financial data is being collated and curated for the good of the customer
- Exploring the current development and benefits of APIs for mortgages, pensions, salary payments and more
- Overcoming customer authentication challenges
- Implementing a mandatory login system for merchants
- PSD3 from a consumer's perspective and how they will benefit from such regulation
- Levelling the playing field between banks and non-banks
- Discovering how PSD3 can be used to re-think the working practices of organisations
- How the private sector is looking at return payments
- The impact this will have on open banking as compared with PSD2
- Exploring FIDA (Financial Data Access and amending Regulations) & how this aids in clarifying the PSD scope
